"I found that there is a generous support of faculty research or preparation of my thesis. The program definitely gives engineering honors students an edge."

Benjamin Aerospace Engineering Los Angeles, CA

"My honors thesis is generously supported by the Undergraduate Research Initiative, which is also responsible for my first paper publication, several professional and academic conference visits and my first internship."

Kirk Computer Science Phoenix, AZ

"Being an engineering honors student provided me with a great opportunity to do research in a biomaterials lab. That experience was of tremendous help when applying for graduate school."

Benjamin Aerospace Engineering Los Angeles, CA

"Ira A. Fulton School of Engineering leadership creativity teamwork"

Ira A. Fulton School of Engineering Honors Students
Our internationally acclaimed faculty are pursuing solutions to the grand challenges facing society, particularly in the areas of biological ..., human systems education energy exploration infrastructure ... and sustainability.

The engineering honors program gives me the freedom to pursue academic interests some of my professors and to broaden my interests outside of the school of engineering. The accelerated learning class in advanced biology, theater and law...
