SAP

SAP is the world’s leading provider of enterprise applications, cloud services, analytics, mobile, and database. SAP helps organizations fight the damaging effects of complexity, generate new opportunities for innovation and growth, and stay ahead of the competition.

From back office to boardroom, warehouse to storefront, desktop to mobile device, SAP empowers people and organizations to work together more efficiently and use business insight more effectively to stay ahead of the competition. We do this by extending the availability of software across on-premise installations, on-demand deployments, in the cloud, and on mobile devices. Our mission is to help companies of all sizes and industries to run better. Our vision is to help the world run better.

Spire

We listen to the three-quarters of the Earth that is remote or covered by water. Our customers make global business decisions and require detailed data in regions that have been critically underserved. Spire’s offering of high frequency, high accuracy data resonated with them, particularly in the areas of global trade, weather, shipping and supply chain, illegal fishing, and maritime domain awareness.

We enable and encourage you to work on things you love because we believe that every individual that joins Spire should be better for having worked here, no matter if they are here for a day, a month or a decade.

We are building the first ever remote-sensing platform capable of delivering unique data multiple times per hour from any point on Earth.
