donor appreciation breakfast
February 12, 2014  |  Old Main, Carson Ballroom
Born in Tempe, Ariz., Ira Fulton grew up a block from the engineering school at Arizona State University that now bears his name. He began defining his own work ethic early in life, starting a paper route at age 11. It grew into a profitable venture that put him through Arizona State College—now Arizona State University—where he met his wife, Mary Lou.

In the 1950s, he went to work for NCR (National Cash Register), where he rose to the heights of National Salesman of the Year. He then launched his first entrepreneurial venture, a computer leasing company that automated several retailing corporations. In 1976, he bought Eagleson’s Big & Tall retail stores and built it from a two-store operation into a 33-store chain.

A few years later, he helped transform Fulton Homes, a struggling real-estate company he had started with some of his nephews, into one of Arizona’s biggest home builders. Under his guidance, Fulton Homes has grown from a small construction company to one of the largest private homebuilders in the country.

More recently, Mr. Fulton has turned his investor’s eye to education. In his philanthropy, he seeks to provide students with opportunities to enrich their education, make them more competitive job applicants and help them build futures for their families.

In 2003, he established an endowment of $50 million in support of ASU’s College of Engineering and Applied Sciences, and the college was re-named the Ira A. Fulton Schools of Engineering in his honor.

Mr. Fulton is a member of the National Academy of Construction. He received an honorary doctorate of engineering from Brigham Young University in 2007.

Katelyn Keberle is a senior in materials science and engineering, and a Tempe native. She shares her love of engineering through student clubs and outreach events. She served as president of the Material Advantage club, and as a regular volunteer at STEM-related outreach events. She has helped share the contributions of engineering to society with Arizona’s elementary and middle school students—and likely inspired some to become the next generation of engineers. She is a Fulton Undergraduate Research Initiative alumna and one of six students from ASU to participate in the competitive National Institute of Standards and Technology Research Experiences for Undergraduates program in Maryland in summer 2012.

She is also a co-founder of FlashFood, a social start-up that connects food donors and recipients through the power of a mobile app — reducing both food insecurity and food waste at the same time. FlashFood began as a team in our Engineering Projects in Community Service program, and grew to win awards in competitions like the U.S. Microsoft Imagine Cup, the YUM! Global Sustainability Challenge and the Dell Social Innovation Challenge as well as securing funding from entrepreneur programs and Ford Motor Company.

In 2013-2014, she received the Dean’s Exemplar Student Award, Ed Denison Memorial Technology Award, Jim Mayer Scholarship and the SMECA Scholarship.

Katelyn has accepted a job with W.L. Gore & Associates, Inc. as a process engineer in the Medical Products Division, and plans on one day completing graduate studies in engineering.
“Cám ơn rất nhiều!” This is how Vietnamese people express how thankful we are to the helper. That is exactly what I want to say many times to you now. Once again, thank you very much for your great support and ‘Cám ơn rất nhiều!’

LONG LE, biomedical engineering, Robert H. Chamberlain Memorial Scholarship recipient

thank you for making a better future possible

“...I would like to do something with computers that is beneficial and meaningful to the world as a whole. There are so many incredible things that we have already found to do with computers – I’d like to contribute to that amazing list. With that in mind, I am looking forward to the next few years of school ahead of me and what my time after ASU will bring. Once again, thank you so much for allowing me to be a recipient of the Tom and JoAnn Prescott New American University Scholarship; I truly appreciate your help in my success at Arizona State University and beyond.”

“I am honored to have been selected as this year’s recipient for the Ira A. Fulton Schools of Engineering Alumni Scholarship. **I am so proud to be able to represent this award, as it not only significantly alleviates the stress of paying for my undergraduate education, it further motivates me to continue to hold a high standard of work ethic, since it is clear that at Arizona State University, it does not go unnoticed.**”

“...with the Carter Opportunity Scholarship, I have the blessing to begin my professional life looking forward to progress instead of looking forward to debt. I am extremely thankful for this opportunity which you have given me.”

MARIELA ROBLEDO, chemical engineering, Carter Opportunity Scholarship recipient
ANH TUYET TRUONG, construction management, Advancing Women in Construction (AWIC), Charles and Nancy O’Bannon Scholarship for Construction and Del E. Webb Foundation Women in Construction Scholarship recipient

BRETT LARSEN, electrical engineering, Dean’s Exemplar Student Award and Daniel Zusman Scholarship for Excellence recipient

KAILEY RUMBO, biomedical engineering, Arlo Richardson Scholarship recipient

STEPHENV WARREN, mechanical engineering, W.L. Gore and Associates, Inc. 4+1 Applied Project Scholarship recipient

MORGAN KELLEY, chemical engineering, Arlo Richardson Scholarship and SMECA Scholarship recipient

BRITTANY DUONG, biomedical engineering, Robert H. Chamberlain Memorial Scholarship recipient

MARLYNN RADFORD-BROWN, heavy construction management, Advancing Women in Construction (AWIC), The Ames Family Scholarship and Dr. Sandra L. Weber Memorial Scholarship recipient

ABBAS JABER, mechanical engineering, Peter Stein Measurement Engineering Scholarship and W.L. Gore and Associates, Inc. 4+1 Applied Project Scholarship recipient

"I am honored to be able to associate myself with such generous individuals as yourselves and with an innovative and responsible company like W.L. Gore. I hope that one day I will be fortunate enough to be in a position where I can help students realize their dreams just as you have helped me to realize my own."

MICHAEL MACHAS, chemical engineering, W.L. Gore and Associates, Inc. 4+1 Applied Project Scholarship recipient

"Throughout my whole life I always tried to work hard and prove to myself that when I put effort into something, there will always be something good that comes out of it. I am so appreciative that I am receiving this scholarship and would like to thank you for making my life easier when it comes to paying for my college tuition."

SARA ALMALIH, computer systems engineering, Stanley C. and Helen K. Delpier Scholarship recipient

"I would like to express my extreme gratitude...as it relates to my Ames Family scholarship. As a single mother of two young boys and a full-time college student, knowing that I am worthy of such an honorable bestowment provides me with the mental support and strength I need to accomplish my goals."

JARED BECKER, electrical engineering, International Switching Symposium Scholarship recipient

"We thank you, donors"
